

Project-based File Sharing

Built for AEC professionals, OpCenter Share is a project centric file sharing solution to easily Organize, Share, and Track project files in the cloud. Collaborate on files with all team members, including 3-D Revit models, photos, videos, plans, and As-Built drawings. OpCenter Share users can preview documents online without first downloading the entire file.

Take Control – Manage Who Sees What

OpCenter Share's permission settings let you control who sees which information. Set up folders and assign different access rights for Architects, Contractors, Engineers and Owners to control who can see certain project information.

Access from Anywhere

Cloud-based and mobile-friendly, OpCenter Share is accessible wherever your work takes you.

Track Activity on Multiple Projects

OpCenter Share provides valuable audit trails on your projects. Track project activity in real time to know the actions taken by every member of your team . . . for every project.

Safe and Secure Project Data

OpCenter Share is hosted at a world premier enterprise-class hosting facility. Redundant servers, encrypted data transmission, data backup, and 24x7 monitoring keeps your valuable information secure.

OpCenter Share Features

- User-level and folder-level permissions
- Integrated document viewer
- Track project activity in real-time
- Email notifications to alert project team of important changes
- Revision history
- Mobile-friendly

“OpCenter Share is easier to use than FTP. It is easy to setup projects and restrict access to certain documents. People only see what we want them to see.”

Rob Uhrin, Architect / Partner at Cooper Carry
